# Chapter 1

## Class Index

### 1.1 Class List

Here are the classes, structs, unions and interfaces with brief descriptions:

<a href="#">matrix</a>	The class that is responsible for the matrix . . . . .	<a href="#">5</a>
------------------------	--	-------------------

## Chapter 2

# File Index

### 2.1 File List

Here is a list of all documented files with brief descriptions:

<a href="#">matrix.h</a> . . . . .	11
------------------------------------	----

## Chapter 3

# Class Documentation

### 3.1 matrix Class Reference

The class that is responsible for the matrix.

```
#include <matrix.h>
```

#### Public Member Functions

- `int rozmiar () const`
- `matrix ()`  
*The constructor of the class without parameters.*
- `matrix (int n)`  
*The constructor of the class.*
- `matrix (int n, int *t)`  
*The constructor of the class.*
- `matrix (const matrix &m)`  
*The constructor of the class.*
- `matrix &alokuj (int n)`  
*Allocate a matrix for the given size.*
- `matrix &wstaw (int x, int y, int wartosc)`  
*Inserts a value into the matrix at the designated coordinates.*
- `int pokaz (int x, int y) const`  
*Print the field at the given coordinates.*
- `matrix &odwroc ()`  
*Invert the matrix.*
- `matrix &losuj ()`  
*Fill the matrix with random numbers.*
- `matrix &losuj (int x)`  
*Fill the array with an amount of random numbers in random positions.*
- `matrix &diagonalna (int *t)`  
*Fill the diagonal with the values from the array.*
- `matrix &diagonalna_k (int k, int *t)`  
*Fill the diagonal with the values from the array at an offset line.*
- `matrix &kolumna (int x, int *t)`

- Draw a column within the matrix.*

  - **matrix** & **wiersz** (int y, int \*t)
- Draw a row within the matrix.*

  - **matrix** & **przekatna** ()
- Fills the matrix with ones on the diagonal.*

  - **matrix** & **pod\_przekatna** ()
- Fills the matrix with ones below the diagonal.*

  - **matrix** & **nad\_przekatna** ()
- Fills the matrix with ones above the diagonal.*

  - **matrix** & **szachownica** ()
- Fills the matrix with a checkerboard of ones and zeroes.*

  - **matrix** & **ustal** (int \*t)
- Fills the matrix from the given array.*

  - **matrix** & **zero** ()
- Clear the matrix.*

  - **matrix operator+** (const **matrix** &m) const
- Operator overloading for addition.*

  - **matrix operator\*** (**matrix** &m)
- Operator overloading for multiplication.*

  - **matrix operator+** (int a) const
- Operator overloading for pre-incrementation.*

  - **matrix operator\*** (int a) const
- Operator overloading for multiplying with integers.*

  - **matrix operator-** (int a) const
- Operator overloading for subtraction.*

  - **matrix operator++** (int)
- Operator overloading for incrementation.*

  - **matrix operator--** (int)
- Operator overloading for derementation.*

  - **matrix** & **operator+=** (int a)
- Operator overloading for additive assigning.*

  - **matrix** & **operator-=** (int a)
- Operator overloading for subtractive assigning.*

  - **matrix** & **operator\*=** (int a)
- Operator overloading for multiplicative assigning.*

  - **matrix** & **operator()** (double a)
- Operator overloading for brackets, in this case adding the whole part of the double.*

  - bool **operator==** (const **matrix** &m) const
- Operator overloading for comparison.*

  - bool **operator>** (const **matrix** &m) const
- Operator overloading for the greater comparison.*

  - bool **operator<** (const **matrix** &m) const
- Operator overloading for the lesser comparison.*

## Friends

- **matrix operator+** (int a, const **matrix** &m)
- Operator overloading for addition with integers.*
- **matrix operator\*** (int a, const **matrix** &m)
- Operator overloading for multiplying with integer.*
- **matrix operator-** (int a, const **matrix** &m)
- Operator overloading for subtraction with integers.*
- std::ostream & **operator<<** (std::ostream &o, const **matrix** &m)
- Operator overloading for printing a whole matrix.*

### 3.1.1 Detailed Description

The class that is responsible for the matrix.

### 3.1.2 Constructor & Destructor Documentation

#### 3.1.2.1 matrix() [1/3]

```
matrix::matrix (  
    int n)
```

The constructor of the class.

##### Parameters

	<i>The</i>	desired size
--	------------	--------------

#### 3.1.2.2 matrix() [2/3]

```
matrix::matrix (  
    int n,  
    int * t)
```

The constructor of the class.

##### Parameters

	<i>The</i>	desired size
	<i>The</i>	array to draw from

#### 3.1.2.3 matrix() [3/3]

```
matrix::matrix (  
    const matrix & m)
```

The constructor of the class.

##### Parameters

	<i>The</i>	matrix to copy from
--	------------	---------------------

### 3.1.3 Member Function Documentation

#### 3.1.3.1 alokuj()

```
matrix & matrix::alokuj (  
    int n)
```

Allocate a matrix for the given size.

## Parameters

	<i>The</i>	desired size
--	------------	--------------

**3.1.3.2 diagonalna()**

```
matrix & matrix::diagonalna (
    int * t)
```

Fill the diagonal with the values from the array.

## Parameters

	<i>The</i>	array to draw from
--	------------	--------------------

**3.1.3.3 diagonalna\_k()**

```
matrix & matrix::diagonalna_k (
    int k,
    int * t)
```

Fill the diagonal with the values from the array at an offset line.

## Parameters

	<i>The</i>	offset
	<i>The</i>	array to draw from

**3.1.3.4 kolumna()**

```
matrix & matrix::kolumna (
    int x,
    int * t)
```

Draw a column within the matrix.

## Parameters

	<i>The</i>	column number
	<i>The</i>	array to draw from

**3.1.3.5 losuj()**

```
matrix & matrix::losuj (
    int x)
```

Fill the array with an amount of random numbers in random positions.

## Parameters

	<i>The</i>	amount of numbers to fill
--	------------	---------------------------

**3.1.3.6 wiersz()**

```
matrix & matrix::wiersz (
    int y,
    int * t)
```

Draw a row within the matrix.

## Parameters

	<i>The</i>	row number
	<i>The</i>	array to draw from

The documentation for this class was generated from the following files:

- matrix.h
- alokuj.cpp
- diagonalna.cpp
- diagonalna\_k.cpp
- kolumna.cpp
- losuj.cpp
- losuj\_x.cpp
- matrix.cpp
- nad\_przekatna.cpp
- odwroc.cpp
- operator(wpisana liczba).cpp
- operator++(inkr).cpp
- operator++.cpp
- operator+.cpp
- operator+a.cpp
- operator--(inkr).cpp
- operator-.cpp
- operator-a.cpp
- operator==.cpp
- operator\_mniejsze.cpp
- operator\_wieksze.cpp
- operatorx.cpp
- operatorxa.cpp
- operatorxx.cpp
- pod\_przekatna.cpp
- pokaz.cpp
- przekatna.cpp
- szachownica.cpp
- ustal.cpp
- wiersz.cpp
- wstaw.cpp
- zero.cpp
